
Former Italian President Francesco Cossiga and Former US Vice President Al Gore Stir the World in Confronting the Horrors of US Administration Intelligence and EcoPolicies

Betrayal and Treason Against the American and Muslim Peoples Carried out by the CIA and Mossad – Intelligence Agencies of the United States of America and the State of Israel -- was alleged in an uncorroborated interview of former Italian President Francesco Cossiga published in the leading Italian newspaper **Corriere della Sera** Nov 30, 2007. Below is an English language translation by Google of pertinent sections of the interview:

Commenting on a video montage produced in the studios of the Media set in Milan and broadcast on the Islamic Al Jazeera network, in which Osama Bin Laden appears, Francesco Cossiga, President Emeritus of the Republic of Italy states in pertinent part: "... non-authenticity of the video is evidenced by the fact that Osama Bin Laden in it 'confesses' that Al Qaeda was the author of the assassination 11 September at two towers in New York, while all ... now know well that the disastrous attack was planned and carried out by the American CIA and the Mossad with the help of the Zionist world order [to] accus[e] the Arab countries and to induce the Western powers to intervene in Iraq and in Afghanistan..."

Cossiga's interview was published on the same day that Sen. Joe Biden (D-DE), Chairman of the Senate Foreign Relations Committee, warned President Bush that he would **move for impeachment** if the president unilaterally authorized a military strike against Iran. Ironically, Cossiga disclosed no proof of his potentially explosive allegations, but his observations published by the most important newspaper in Italy, were enough of a warning to the intelligence establishment to get their immediate attention. Three days after Cossiga's report, on Dec 3, 2007, **16-American intelligence agencies published their conclusions** -- to the consternation of George W. Bush -- that Iran halted their nuclear weapons program in 2003, effectively blocking Bush's threatened new preemptive war against Iran!

Gore at Bali, Courtesy of Reuters

Another similar drama unfolded at the **UN Climate Change Conference** on Bali Island, when former US Vice President Al Gore drew cheers at 190-nation talks by saying the United States was the main block to launching negotiations in Bali on a new global climate treaty. He urged the delegates to work around the obstinate US Administration of George W. Bush, by leaving room in the new treaty for a new Administration in the United States which would be brought into office by the people during the coming election year.

Indeed, immediately following the UN Climate Conference held December 3–14, 2007, anticipation of the new “new world order” was on display December 18, 2007, when an innovative and efficient **energy bill** that was enacted by the US Congress by a wide margin was signed by President Bush.

These stories of high drama told by men in high places of high principle who seek to prevent the looming climate disaster and a new potentially disastrous “preventative war” in Iran pursued by the Bush Administration,

strike a stunning shadow of treason and calamity against humanity. Both of these stories are energy generated. Both of these stories reveal the extraordinary risks of political demagoguery in a democracy.

Given the pathological dishonesty, violence, and continuing threat to the freedom, liberty, and security of the world posed by the Administration of George W. Bush, this honorable gentleman is now, perhaps, the least admired and most widely hated President of the United States of America in history, supported primarily by the “Big Money” Plutocracy.

There are any number of impeachment efforts working their way through the US Civil Society and the US Congress, at this time, including the following:

- **The National Impeachment Resource Center of After Downing Street.org;**
- **openly Rep. Dennis Kucinich (D-OH) bill to impeach Vice President Richard Cheney reported in the Daily Kos.**
- **Rep. Robert Wexler (D-FL) call for impeachment hearings against Vice President Richard Cheney, reported in AlterNet..**
- **Civil Movement to impeach President George W. Bush, reported in Wikipedia.**

The big story about the horrors of US Administration Intelligence policies comes to America by no American patriot but from the former President of Italy who knows how the intelligence systems work. While he held high public office in the Republic of Italy Cossiga **re-structured the Italian police, civil defense, and the secret service**. While Cossiga's explosive remarks were published by the leading newspaper in Italy, *Corriere della Sera*, American news media have suppressed this story to protect their favored "Big Money" clients.

The big story about climate change comes from the Nobel Laureate and former U.S. Vice President Al Gore, who was defeated in the 2000 election for US President after winning the popular vote, by the dirty tricks of the Bush cabal, has since won the hearts of the world as the champion of sane and reasonable global ecopolicies.

The New York Times and *The Washington Post* have played a leading role in these matters, all people everywhere should remember, primarily to inform and advocate the outrageous lies and disinformation fabricated by the US nonconservative power block, while normalizing the despicable practices of capitalist decadence derived from the **philosophy of greed** advocated by the late Milton Friedman (Playboy interview, 1973). These irresponsible practices have indubitably sustained the wars of suffering and death during recent decades, rather than accepting responsibility for democratic alternatives to sustain environmental integrity and social justice in a 21st century planetary ecology supportive of all life.

The driving forces are beginning to change, however. *The New York Times*, on December 29, 2007, published a favorable Video Report on the campaign of Presidential Candidate John Edwards, featuring his **Iowa Closing Argument**. Mainstream media has now also begun to open their control over the broadcast spectrum to the voice of the people in the determined effort led by Congressman Robert Wexler (D-FL) to **impeach Vice President Richard Cheney**.

Ultimately, the voice of the people must be obeyed by all democratic institutions!
